

InLoox

Project Management Software – Integrated in Microsoft Outlook

InLoox – State-of-the-art Project Management

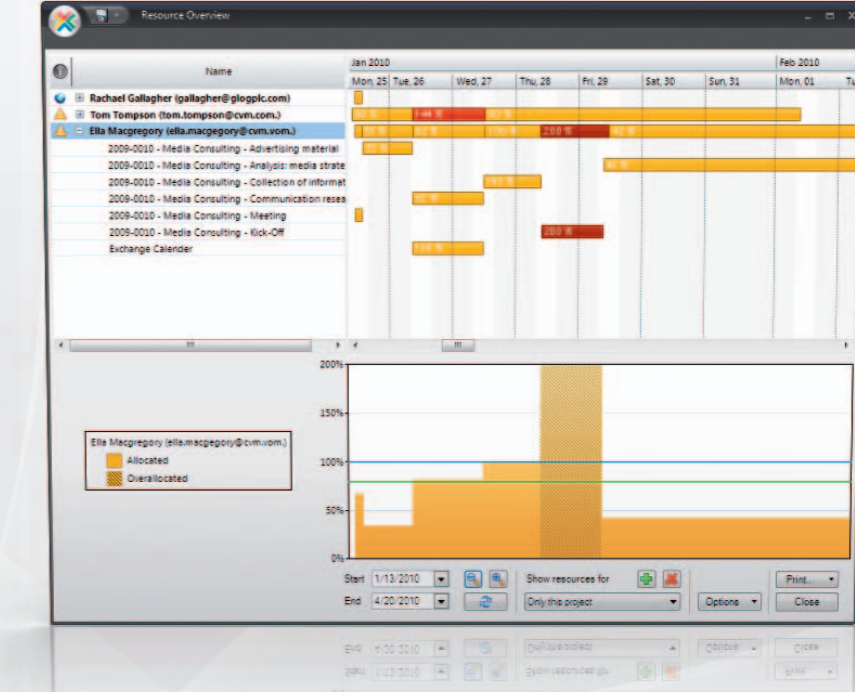

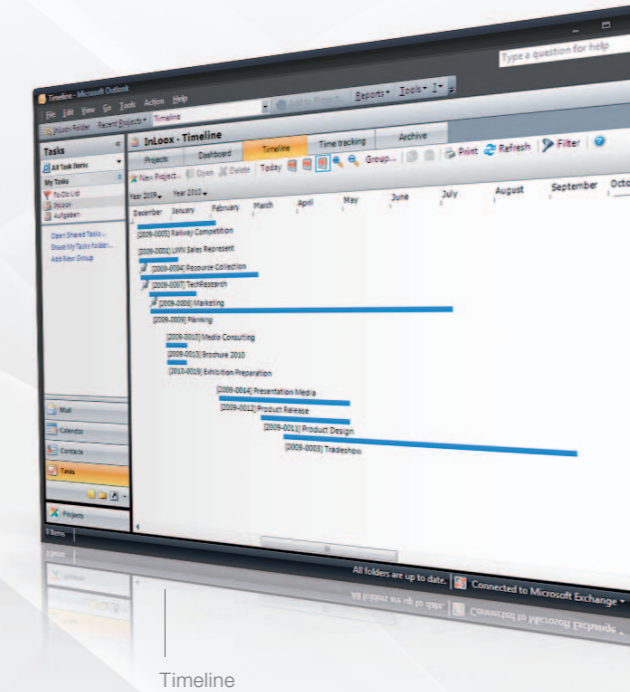

Experience the Performance of the Market Leader*

InLoox is the reliable and flexible solution for professional project management: the software is integrated directly into Microsoft Outlook and facilitates the combined management of projects, documents, resources, Mind Maps and budgets.

Everyday project management is made easy with InLoox. The realization of projects becomes faster, safer and more efficient. Usability and practicality are two of the main focuses of InLoox.

It is easy to set things straight with InLoox: it can be mastered quickly, it is easy to handle and structured concisely. In short, it is the best way to clean up your desk and clear your mind.

easy-to-use
 + 25,000 users
 = a solution, that works!

① Dashboard

Supervise expenses, returns and deadlines of your project portfolio effortlessly. The graphically displayed project dashboard in InLoox shows you key data and developments at a glance. Budget overruns and missed deadlines can be identified in advance, making it possible to react in time.

Chief Executive Officer:

„Expenses and important milestones at a glance - that's what I call business support.“

② Work Packages

With work packages, you can clarify affiliations and responsibilities. Through the assignment of packages, teams and individuals know exactly what to do, and when to do it. Work packages are linked to the project schedule and can also be tied in with Outlook appointments and tasks. Feedback of progress into the project schedule couldn't be easier!

* regarding feature set of solutions completely integrated in Microsoft Outlook

Team Member:

„As I have worked with Outlook before, I was comfortable with InLoox from the first second.“

Report Designer

At the push of a button, the highly flexible report designer issues reports such as project summaries, budget lists, expense reports and plan/actual comparisons in a variety of file formats like Microsoft Excel, Microsoft Word, HTML, PDF and many more.

Email Templates and Predefined Text Modules

InLoox improves the flow of information between project participants and decision makers with professional email templates and boilerplates. During the composition of a new email, InLoox automatically provides all available templates and boilerplates, saving a lot of time in the process.

Permissions

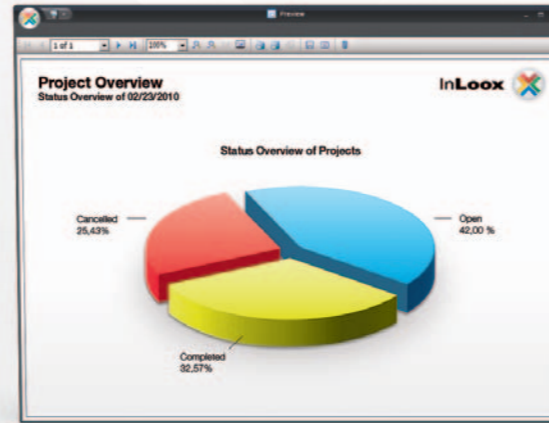

The well-proven role and account-based security architecture allows you to assign permissions without much administrative effort. Responsibilities are thus clearly defined, at the same time making sure that only authorized users gain access to sensitive data.

Quick Access Panels

Thanks to Quick Access Panels, Outlook tasks, appointments, emails and contacts are directly linked to work packages, milestones, projects and contact persons. Important information is reconciled automatically.

Customizability

InLoox adapts to your company – not the other way around. The professional Report Designer is part of the standard package. In addition, there are numerous configuration options, none of which require programming experience. For example, you can create custom fields (numbers, currencies, open and closed lists etc.) to customize the software according to your specific needs.

Project Name	Number	Role
Role Customer	2009-0004	Customer
Role Project Manager	2009-0001	Project Manager
