InLoox

Overview for
IT Professionals

Author

InLoox GmbH

Date

23/05/2025

What is InLoox?

In one sentence

InLoox is a powerful project management software that helps teams and organizations to plan, manage and successfully implement their projects more efficiently.

Integrated in Microsoft 365

The platform integrates seamlessly into Microsoft 365, which makes it especially attractive for teams that already work intensively with the Microsoft product suite.

InLoox provides additional value in any Microsoft landscape

Supplement basic tools sensibly

Enhance Teams, Outlook, and more with advanced tools for capacity planning, prioritization, and management - beyond isolated solutions

Full support for cloud and on-premise

You decide where & how

_____

Based on Microsoft Azure, we offer a ready-to-use platform with hosting in certified data centers in Germany with flexible runtimes (starting from 1 month).

Likewise, InLoox can also be operated completely locally and isolated on your corporate IT. You can find out more about the system requirements online under www.inloox.com/system-requirements/.
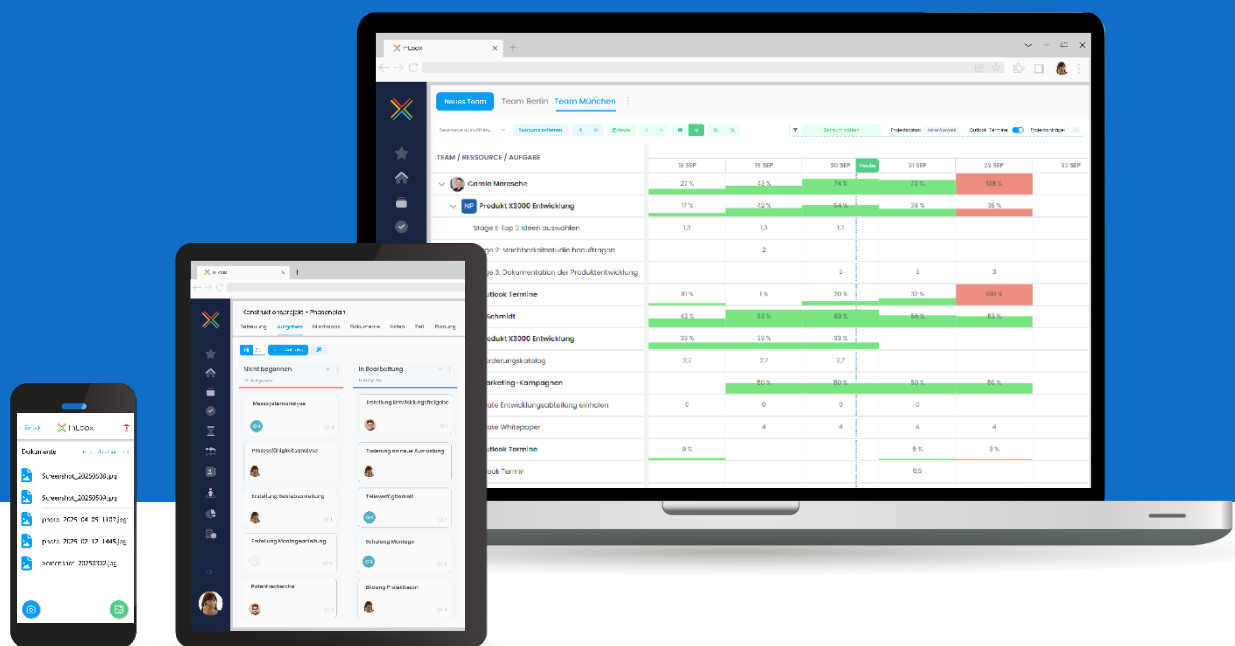

Core features

▪ Enterprise project management

InLoox enables holistic and forward-looking multi-project management and is based on the existing Microsoft infrastructure.

▪ Resource management

InLoox provides real-time data about line and project workloads for all teams - including Microsoft Exchange Online calendar assignments.

InLoox is accepted and practiced because it is at home wherever users are already familiar with it - for example, in the inbox, calendar or Microsoft Teams. This facilitates the introduction in the company and significantly improves both acceptance and data quality.

Advantages

Low setup and maintenance effort

No installation is required for cloud operation. On premise servers can be launched on an existing Microsoft Internet Information Server.

Single sign-on available as standard

For user authentication, Microsoft Active Directory or Microsoft Entra ID (formerly Azure Active Directory) can be used - a convenience plus for users and administrators alike.

Technical support directly from the manufacturer

The support of InLoox is always there to help you ensure the smooth operation of the software.

System requirements

InLoox requires a browser.

You can find out more about the system requirements in on-premise operation under www.inloox.com/system-requirements/.
