

The Project Management Software integrated
in Microsoft® Outlook® and on the Web

InLoox PM Web App The Online Project Software

Stay Connected to Your Team
No Matter Where You Are

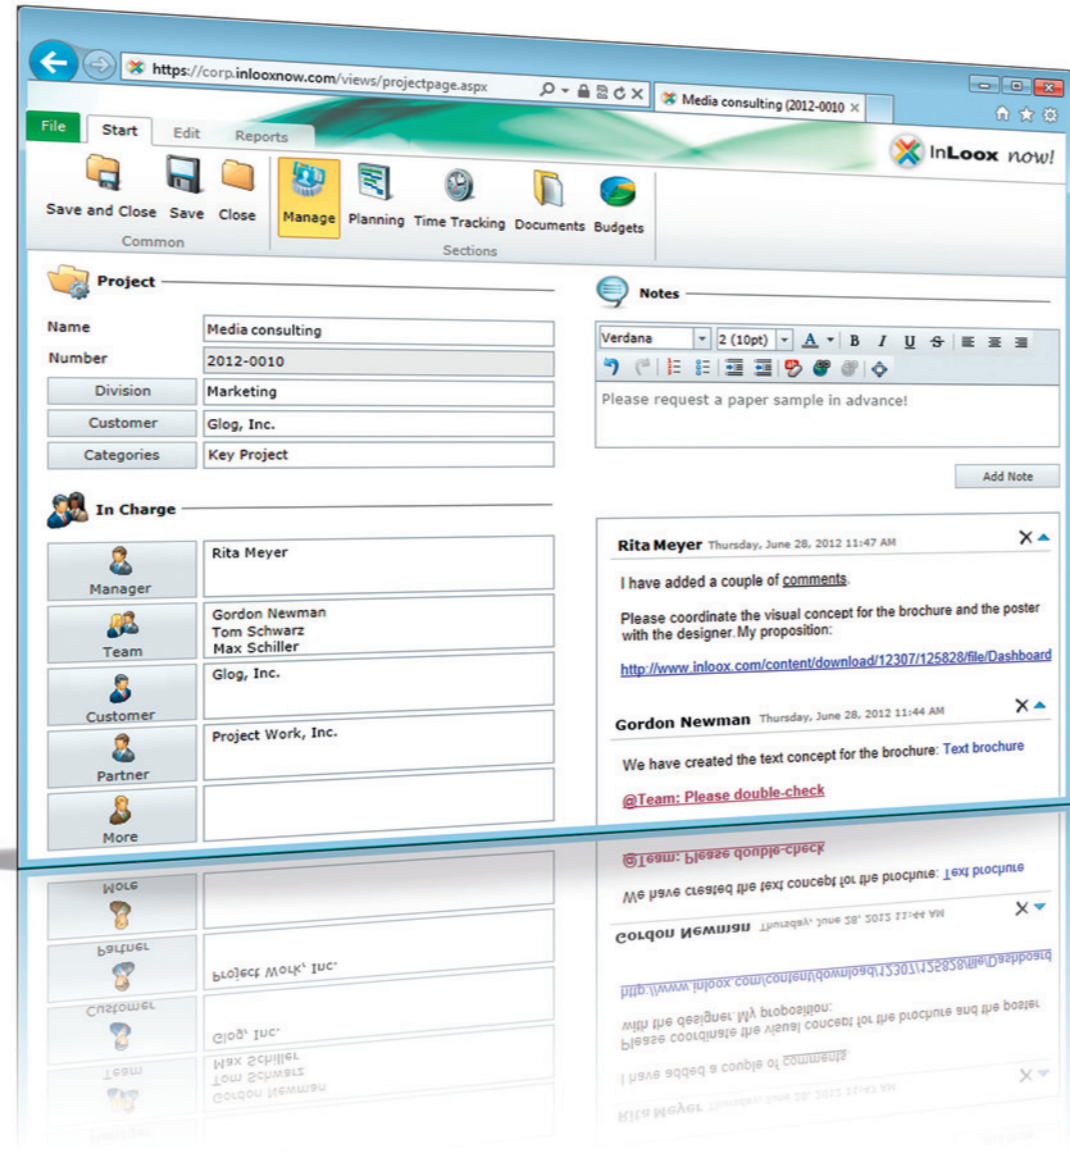

The Project Management Software integrated in Microsoft® Outlook® and on the Web

Worldwide Availability – Familiar Usability

InLoox PM Web App is the powerful, secure and scalable platform for professional project management on the Internet. With InLoox PM Web App, you plan, manage, budget and document your projects directly via an intuitive online interface.

Collaborate with your team in a virtual project room – no matter where you are – InLoox PM Web App makes your projects mobile. Integrate mobile team members, external project partners and freelancers into your project environment. This makes your projects available anytime, anywhere – you always have an overview.

easy-to-use
+ *secure and reliable*
= *a solution that works*

Connect Your Project Teams over the Internet

Platform- and Device-Independent

InLoox PM Web App supports all the major Internet browsers, which makes the access really easy. No matter if you use InLoox PM Web App via smartphone, notebook, Apple Mac, desktop or tablet PC – the online project platform sets no technical boundaries. That enables you to use it in many different situations – whether at a customer’s site, on business trips or working from home.

The encrypted connection to the project server keeps your data safe. The security architecture allows you to assign permissions for projects and information individually with very little administrative effort.

You can use InLoox PM Web App in combination with InLoox PM for Outlook or completely independent of it – just as you like. Switching between the desktop and the web client couldn’t be easier. The central database keeps all your data synchronized.

Project Manager:

“With InLoox PM Web App, I always keep track of our projects – without any additional calls or e-mails.”

①

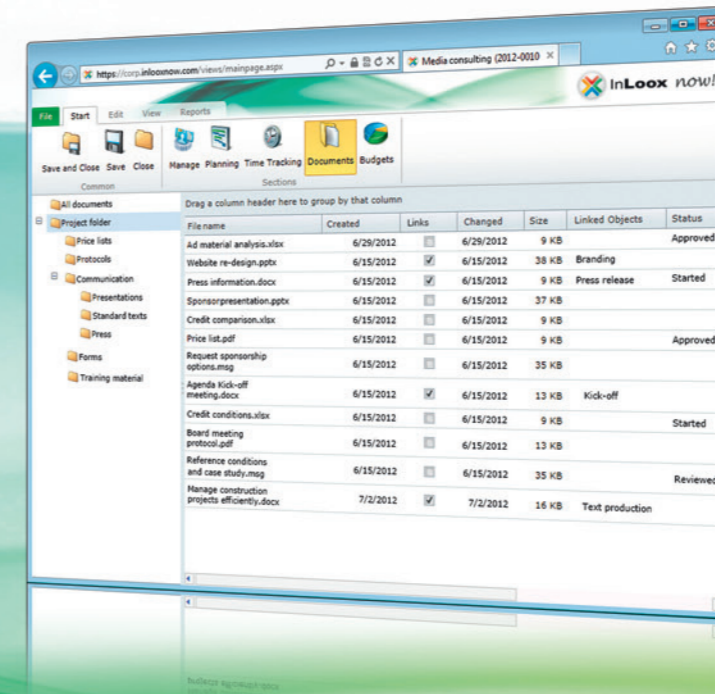

②

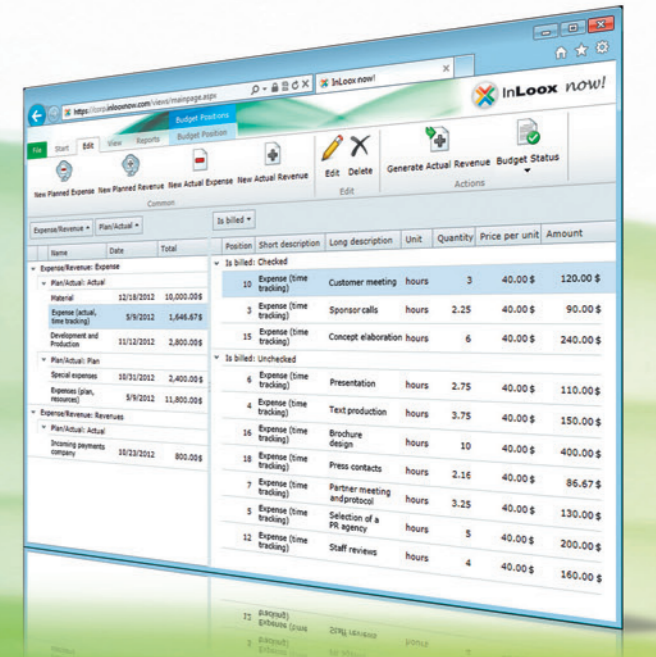

③

④

⑤

Team member:

"I can easily switch between the Outlook and the web client. So, no matter where I am, I have instant access to my project data."

① Project time tracking

Record work hours of current projects in real time. Maintain a complete documentation of activities, for such things as billing. This way, you avoid media breaks, unnecessary administrative work and easily keep track of your projects.

② Resource overview

Get a visual overview of all relevant project resources – be it staff, rooms or tools. You can see at a glance which resources are still available, which are allocated and which are over-allocated.

③ Time planning

Keep an overview of upcoming tasks and the progress of your project using the visual time planning of a Gantt chart. Any changes to the project plan can be communicated to the team. The project team is always up-to-date on task status and important milestones.

④ Document management

InLoox PM Web App organizes your project files. Every project offers access to related documents. E-mails, Office documents and other files can be saved in the corresponding project folder directly via your web browser. In addition, files can be marked with tags showing their status, for example.

⑤ Budgeting

Define the financial scope of your projects quickly and clearly with InLoox PM Web App – with planned and actual expenses and revenues. Easily create budgets, calculations, quotations and invoices. It is also possible to maintain regular billing, based on time tracking. InLoox PM Web App enables you to keep track of your project budgets at any time.

Innovative Features – Easy to Use

System administrator:

"With InLoox PM, I have the choice – I can deploy it as an on-premise installation or as online service in the Cloud."

⑥ Report designer*

At the push of a button, the highly flexible report designer issues reports, such as project overviews, budget lists, expense reports and plan/actual comparisons in a variety of file formats, such as Microsoft Word, HTML, PDF and many more. The professional report designer is part of the standard package.

⑦ Available as licensing or leasing model

In addition to the classic licensing model, InLoox PM Web App is also available as a turnkey service: benefit from transparent pay-as-you-go plans that are flexibly scalable – start your own online project platform within just a few minutes. Installation, maintenance and on-going support of the server infrastructure are provided by InLoox.

* requires Microsoft Windows

⑧ Permissions

The well-proven role and account-based security architecture allows you to assign permissions with very little administrative effort. Responsibilities are clearly defined, ensuring that only authorized users gain access to sensitive data.

⑨ Combination with InLoox PM for Outlook

InLoox PM Web App can be used in combination with the desktop client for Microsoft Outlook. The central database synchronizes all data automatically. InLoox PM Web App can be, just as easily, used completely independently of InLoox PM for Outlook.

⑩ Customizability

InLoox PM Web App adapts to your company – not the other way around. In addition, there are numerous configuration options, none of which require programming experience. For example, you can create custom fields (numbers, currencies, open and closed lists etc.) to customize the software according to your internal needs.

InLoox PM Web App
The Online Project Software

Online Project Management Made Easy

InLoox PM Web App makes accessing online project management really easy. You can choose between two tailored usage models.

The project platform InLoox now! offers InLoox PM Web App as an online service in the cloud at the push of a button. All features are available on demand to you and your team. You only pay for the services that you actually want to use, thus reducing investment and operational costs. Benefit from transparent pay-as-you-go plans. External project partners can be integrated effortlessly into your project environment as the platform grows with your business. InLoox is your reliable partner that gives data security top priority.

The classic licensing model is, of course, also available. This enables you to install InLoox PM Web App on-premise. All data remain in your company and you always have full data access.
