

The Benefits of InLoox now!

InLoox now! is the reliable, secure and flexible project management solution in the cloud. You can cleverly plan and control tasks and projects via web browser, directly in Microsoft Outlook and via the mobile apps for iOS & Android anytime, anywhere.

✓ Start immediately

Thanks to our cloud technology, you don't need your own server infrastructure. You can invite your team immediately after creating an account and get started right away.

✓ All inclusive

In addition to the Outlook client, you can use the web and mobile client for iOS & Android at no extra charge. So you have access to your project data from anywhere - whether in the office or at home.

✓ More convenience

Thanks to the Office 365 and ADFS integration, users can log on to InLoox easily and conveniently via single sign-on and get started right away.

✓ Reduced costs

There are no costs for server licenses or for the purchase of server hardware. Thanks to the free storage space of up to 25 GB per user, you do not need an additional server/network for documents & files. This means that there is no need for costly server updates and the associated administration effort for you.

✓ More flexibility

The InLoox now! price model is flexible. You can flexibly adjust the number of users per month/year according to your needs. You can order additional user licenses at any time. Current customers and those switching from InLoox PM benefit from attractive special offers when switching to InLoox now!.

✓ Free upgrades

All updates and upgrades are included. As soon as a new InLoox version is available, you can use it immediately at no extra cost. You can try out new features directly and benefit from optimizations.

✓ Clever notifications

Never miss important project updates thanks to automatic notifications. InLoox notifies you immediately, e.g. when the status of a task has been changed or there is a new comment. You can easily switch from the notification directly to the relevant area. You can determine how often you wish to receive notifications and can thus adapt InLoox to your daily work routine.

✓ More integrations

InLoox now! offers standard integrations to other Microsoft Office 365 programs such as Teams, PowerBI or PowerAutomate. Thanks to the open application programming interface (API) you can also easily integrate other systems with InLoox, such as SAP, Salesforce and other CRM and ERP systems. This enables you to easily integrate InLoox into your existing system landscape and processes.

✓ Easy collaboration

Simply integrate locations, partners, suppliers and other external parties into InLoox - even without VPN. The access to InLoox now! is via the cloud. Thanks to the free and unlimited number of contributors*, you can integrate freelancers and other external parties into the project at no extra cost.

” *InLoox is the right project management system for all our assignments, being flexible, straightforward and logical to operate. InLoox adjusts itself to the company's workflow, increasing the transparency and effectiveness of projects both by 60% and 20% compared to the past.* “

Joachim Boenisch, General Manager, eska Ingenieurgesellschaft
